New Products

EQ&S

For the homeowner or contractor, soldering copper joint connections (fittings, valves, etc) can be stressful and at times a fire hazard. To solve that issue, we will be stocking a variety of **Sharkbite** fittings. These are push-fit connection systems for copper, CPVC or PEX pipe in any combination. Making plumbing projects fast and easy. www.sharkbite.com

Rental

Grout Hog GPH-75 is a large grout mixer for use on a forklift. The **Grout Hog** GPH-75 is ideal for high-rise construction, piers, columns and interior wall. It has a $\frac{3}{4}$ cubic yard capacity and a 13hp Honda motor. The average unload time is about 3 minutes and is remote control operated. We also carry other **EZ-Grout** products like the wall bracing system which is available for rent. Please call the Rental Counter with any questions and rental rates.

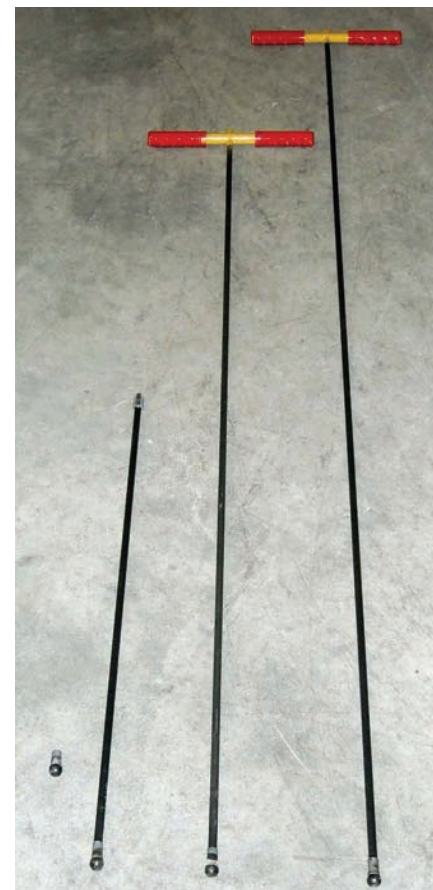

Instrument

Tile Probes are an old school way of locating a pipe, or septic tank, in the ground. One can "probe" around by pushing a steel rod into the dirt until it is stopped by (presumably) the pipe or tank. These "T" handle probes are made of $\frac{5}{16}$ " dia. spring steel with a replaceable "ball tip" of a slightly larger diameter. The larger diameter ball end compresses the dirt to the sides, clearing a path, for the probe to penetrate the ground with less effort.

We will stock the 48" version at the following locations: East, SNE, SPDI & Instruments.

A 60" probe is available (special order for now) as well as a 24" extension & replacement tip. Please be aware that that these probes are made of steel and are very conductive. Do not use around power lines.

Tile Probes

East

Adjustable Kickers:

Save 30-60% in labor costs

Bridge Decks:

These are one of the Adjustable Kicker's best and most time-saving applications. Simply nail the Kicker to the plywood surface and attach it to the form. Then align the form to the proper position.

Slabs on Grade:

The Adjustable Kicker braces to both the top and bottom of the forms, which allows for straighter, more level floors with less work.

Monolithic Pours:

A third hole in the base of the Adjustable Kicker allows it to hang over an open footing, and you don't have to worry about removing the pin from the concrete

Curbs:

Because of its versatility, the Adjustable Kicker makes radius curves faster, easier and more uniform.

High-Rise Buildings:

The base plate allows the Adjustable Kicker to move backward and forward while remaining attached to the form and flyer table during high-rise building construction.

New Pellet Special at the Avon and Southington SHS&L Locations:

\$299.00 Professional Pellet Stove and Insert Installations has just gotten better... not only is the installation special still on at \$299.00, but we have added "Buy Any Pellet Stove or Insert and the first ton of Superior Premium Hardwood Pellets is Absolutely FREE." (not including delivery of course)

Technology & Accounting

Site

Superior has purchased a new TV Pipe inspection unit for the Special Services Division. The new unit has been placed into service and is up and running. We are pleased with the unit and we have successfully completed a handful of TV inspection projects already. The new camera is capable of televising pipe lines 6" thru 30" diameter.

Trade Shows & Seminars

Instrument

The Connecticut Association of Land Surveyors is having their annual meeting at Mountain Ridge (formerly Mountain Side) in Wallingford on November 6. Superior Instrument, a sustaining member for nearly 22 years, will be displaying and demonstrating the latest Instruments and technology. In an effort to promote our GPS Network we are sponsoring a "GPS Treasure Hunt". Entrants will draw a "treasure map" from our treasure chest and take that outside to search for buried treasure. The "map" has coordinates for the location of the treasure which the hunter will enter in our GPS equipment. The GPS will then guide them to the treasure much like your vehicle GPS navigation (but far more accurate [+/- 1/4" !]). This promises to be an exciting event.

ERS

ERS will have a booth at the Jenks Home Show at the Hartford Expo Center the weekend of Nov. 6-8.

SHSL

Fall Home Show by Jenks productions is November 6, 7 & 8, 2009. SHSL and ERS will be there pushing Hearth and Propane for the last official Show/Fair/Exhibit for 2009... Don't worry we have Many more lined up just after the beginning of the New Year.
