Superior Equipment & Supplies

Pex tubing replaces copper and cpvc for water supply lines. It installs quickly and simply with barbed brass fittings and steel crimp rings. It is also used in radiant heat applications. Currently, we stock a full line of 1/2" and 3/4" tubing, fittings and tools.

<http://www.zurnpex.com/>

Unistrut is structural pipe hanging system commonly used by many of our contractors already. We now stock the strut, brackets and pipe hangers.

- Rubber blades and safety chain standard.
- 8 HP HONDA
- Two Year Drum Warranty

\$2595.00

Trade Shows & Seminars

Superior Instrument

Our seminar and training schedule will be released soon for the first quarter of 2010. We have expanded our list of topics to include 3D Modeling for GPS machine control and site staking.

3D modeling is the latest "buzz word" in both the construction market AND Surveying/Engineering. As the use of GPS becomes more widely accepted, the need for experienced CAD technicians to build these 3D "models" is growing. Our seminar will review the basics of modeling in 3D, while introducing Carlson's "Construction" software.

Many of our customers have GPS now. Currently, most are sending their files to 3D Modeling companies across the country, but may be interested in learning to do this work themselves.

Tentative Schedule:

- 3/12 GPS basics. What every GPS user should know.

- 3/16 Carlson SurvCE: Real productivity improvements take place in the field.
Learn to take advantage of the power of SurvCE for true "field to finish" performance.

- 3/26 3D Modeling for GPS machine control and Site staking. The widespread use of GPS is creating the need for 3D Modeling technicians for file preparation. This seminar will introduce you to the concept of 3D modeling and some of the procedures, and issues, that you should understand before undertaking this work.

- 4/1 & 2 Foundation Layout. Learn modern layout techniques and get a grip on your productivity and profitability! Featuring the Trimble LM80 and total station.

- 4/8 & 9 Site staking with total station, Carlson SurvCE & robotics. Capability = Productivity. This basic training class will show you how you can take control of your layout, reducing delays and increasing your bottom line.

- 4/22 & 23 Earthwork Estimating, GPS site staking and Machine Control seminar. Watch as a CAD file for a typical job is transformed into a 3D model and use to generate volume and material quantity reports. See how PDF image files can be used to generate accurate Volumes, and get your hands on a working GPS rover and see how you can stake out using the same data created for your take-off.

Dates are subject to change. See our website for the latest information.

Energy Resource by Superior and Superior Hearth, Spas & Leisure

CT Flower Show Feb. 18-21 Convention Center, Hartford, CT. Superior Hearth, Spas & Leisure is attending.

New Haven County Home and Better Living Show, Feb. 21 & 22 at the Chevrolet Theatre, Wallingford, CT. Superior Hearth, Spas & Leisure and Energy Resource by Superior are attending.

Upcoming Jenks Spring Home Show March 5, 6 & 7 at The Expo Center, Hartford, CT. Superior Hearth, Spas & Leisure and Energy Resource by Superior are attending.

CT Home Show, March 5, 6 & 7 at The Hartford Convention Center, Hartford, CT. Superior Hearth, Spas & Leisure and Energy Resource by Superior are attending.

Technology & Accounting

Superior Instrument

Carlson Software has released the 2010 version of

their line of software. This release includes many new features, some specific to the software target market, but all have the ability to read/write AutoCAD 2010 DWG files. It is expected that the 2010 DWG format will be the standard drawing format for the next 3 years (when it is expected that Auto Desk will change it).

In addition to 2010 DWG file compatibility, most of the 2010 Carlson Software products will now import Microstation DGN files. Microstation is the CAD program used by most D.O.T's, including Connecticut D.O.T.

If you work with AutoCAD files, or do a lot of DOT work, we can offer you a fully compatible, less expensive option to "AutoCAD."
