

# ATTENTION: GIS MANAGERS

**NOW**  
Is The Time  
to Buy!

Only Superior Instrument can make 3D GIS data collection affordable. With the power and convenience of The Superior GPS Network, you can now have survey grade GPS for 3D GIS collection, Starting at **UNDER \$10K**, and 2D systems Starting at Only **\$2,795.00!**

Superior Instrument owns and operates the only fully operational TOPCON GPS Network in CT. The Superior GPS Network provides DGPS correction data for GIS, mapping and survey grade GPS receivers in the field. Our local, precision DGPS data makes typical SBAS mapping receivers more accurate by providing correction data that is closer to the work area. Superior GPS Network subscribers are more productive than users of WAAS, and Coast Guard Beacon Systems, due to the more reliable cellular communication and 24/7 data stream availability.

These new systems are smart, powerful, easy to use and light weight. Using Carlson SurvCE or Fast Survey, you can perform a number of survey and mapping functions including data collection, and stake out and export your data to ESRI shape files. SurvCE and Fast Survey are AutoCAD compatible and can draw maps while collecting data. For ESRI power users, your ArcPad license can be installed to keep your current work flow intact, and minimize the learning curve. **Special Pricing Expires March 31, 2011**

## Topcon GRS-1 Network Rover

Topcon was the first manufacturer to produce a GNSS (dual constellation) GPS receiver in a hand held platform. The GRS-1 is result of years of research and development, and it shows. Topcon quality and Topcon performance for a very affordable price:

**ONLY \$10,850.00\***

(Including Topcon Field Tools for ArcPad)

or **ONLY \$11,995.00\***

(Including TopSurv Software)

## Ashtech PM200

Ashtech is entering the Precision GIS marketing with the new ProMark 200! This GPS unit has a compact design making it the lightest weight, full featured GPS rover available. On screen keyboard, simple user interface and dual use capability make this a great GIS option!

**Package Includes:** L1/L2/Glonass, GSM Modem, (2) batteries, charger, Fast Survey software and carry case.

GIS Systems Starting at

**ONLY \$9,950.00\***

**NEW**

## Carlson Surveyor+ GPS

The GPS Receiver is built onto a rugged hand held PC with full keyboard for easy data entry.

**Package Includes:** L1/L2/Glonass, GSM modem, Carlson SurvCE software, batteries, chargers, 12V cigarette plug chargers, 2M pole, bracket, cable and carry case.

GIS Systems Starting at

**ONLY \$12,995.00\***

\*Access to the Superior GPS Network and cellular data plan NOT included.
